Wi-Fi UPGRADATION POLICY

Wi-Fi is now the primary method by which students, staffs and faculties access the campus network and all other IT services. We have continued to make progress towards our goal of upgrading Wi-Fi infrastructure for all of the campus. Our previous wireless network design and coverage adequately supported the growing level of use such as in offices, PG Departments, lecture halls, canteen and hostels. Over the past years, we have worked to implement improved Wi-Fi services for the campus.

GOALS

Initially, our network design consisted of WLAN with the speed of 100 Mbps. In the recent year, we upgraded our network design to Wi-Fi router and fibre cables with the speed of 1 GBPS. Now, we are planning to upgrade the quality of our Wi-Fi network to improve the performance, campus user experience and to support teaching and research. With faster speed and higher bandwidth allowing us to support more devices, our primary focus will be on educational and research spaces.

Dr. Varsha Jadhav

Dean
